Our customized planning gives direction and meaning to your education and career decisions. By analyzing your career goals, interests, feasibility, and current status, we create a strategy to help you achieve your aspirations.

In this journey, we look forward to your support and feedback.

Thanking you,

Team Arivuu

YOUR PROFILING

Personal profiling is the first step in career planning. The purpose of profiling is to understand your current stage in career planning. It helps in defining your career objectives and roadmap. The ultimate aim of this process is to move you from your current stage of career planning to an optimised stage. Personal profiling includes information about your current stage, the risks involved, and an action plan for your career development.

Current Stage of Planning

Exploring

Exploring: You are at the exploring stage in career planning. We understand that you have a fair idea of a suitable career. At this stage, you have a better understanding of career options. However, you are looking for more information to understand the complete career path and an execution plan to achieve it. A lack of complete information and an execution plan can adversely impact your career. Most career decisions at this stage are based on limited information.

Risks Involved: Career misalignment, incorrect career path judgement, inaccurate career projections, and unnecessary stress

Action Plan: Explore career paths > Align your abilities and interests with the best possible career path > Create a realistic execution plan > Conduct timely reviews of the action plan

YOUR MULTIPLE INTELLIGENCE TYPES

YOUR MULTIPLE INTELLIGENCE ANALYSIS

Visual - Spatial

- **Spatial intelligence** involves the potential to recognize and use the patterns of wider spaces and more confined areas.
- Visual-spatial intelligence allows you to see and modify things in your mind.
- If you score high in this area, you probably have good spatial and visual awareness.
- Students with visual intelligence are artistic.
- They are quite aware of their surroundings and are good at remembering images.
- They have a great sense of direction.
- They like to draw, paint, and read maps.
- They learn best through drawings and visual aids.

Activities - Visual - Spatial

- Use art projects to create representations of the content you are learning.
- Draw related images next to your notes along with arrows between ideas to create connections and reference points.
- Organize with color. Use different-colored highlighters, paper, index cards, folders, or tabs to create a visual system for finding things and grouping topics.
- Visualize your topic. When you are learning something new, imagine what it looks like.

YOUR LEARNING STYLE TYPES

YOUR LEARNING STYLE ANALYSIS

Auditory learning style

- These individuals learn best through verbal lessons, discussions, talking things through, and listening to what others have to say.
- Auditory learners interpret the underlying meaning of speech through listening to the voice tone, pitch, and speed.
- These learners often benefit from reading the text and notes out loud and/or listening to recorded notes and information from texts.

Learning improvement strategies

- Work in groups or with a study partner; i.e., discussions: listening, talking.
- Review assignments and text reading before class.
- Read notes and text out loud.
- Recite information that is important to remember.
- Record notes, key information, and lectures; listen to recordings regularly.
- Use audiobooks/convert books into audios.
- Mathematical/technical information.

YOUR LEARNING STYLE ANALYSIS

Kinesthetic learners

- Kinesthetic (or tactile) learners learn best by touching and doing.
- Hands-on experience is important to kinesthetic learners.
- It includes demonstrations, simulations, videos, and movies of “real” things, as well as case studies, practice, and applications.
- Sometimes, it can be difficult for individuals with this learning preference to sit still for long periods of time.

Learning improvement strategies

- Skim through reading material first to understand the theme or main idea.
- Move around as you read aloud or study; walk and read; work in a standing position.
- Record notes and listen to them while exercising.
- Take frequent study breaks.
- Listen to music while studying.
- Sit in front of the classroom.
- Stay actively engaged in class: take notes, write key points, draw charts.
- Create hands-on learning when possible.
- Use models, extra lab time, visit museums or places that connect to course material.
- Create cards for processes.
- Color code the primary information.
- Limit information; use keywords, symbols, or arrange in order; shuffle and repeat.
- Type over notes from text and class.
- Create spreadsheets, tables, and charts to organize material.
